Oculus is a free and open source app that can act as an importer and an exporter to any of the supported imaging formats. Not only can you import photos to Oculus, you can also export them to TIFF, JPG, GIF and PNG formats from almost any other app. Let's see what can this utility do for you. [b]First things first, you'll need an Android device that can run Android apps. If you're using a device that can't, simply buy yourself a portable battery-boosting USB power adaptor. This is required on portables or smartphones with no battery like the Google Pixel, Nexus 6P and iPhone 7. [b] A dashboard is an area that lets you monitor your network activity and view important information relating to your Wi-Fi connection. In a nutshell, the dashboard helps you keep track of all your active Wi-Fi connections and tells you the status of all the adapters connected. You can set this application to alert you when something goes wrong, so you'll always be aware if your network drops. To start you can install the dashboard on your smartphone or tablet. You'll need to connect to Wi-Fi before you can start and when you do, the application should automatically detect your network and reveal all the connections available. Now that you've made sure everything is working, we'll explain

An in-app browser, an app finder and a app showcase all become available by swiping to the side. The app recognizes the apps you use, allowing you to easily jump to any app you use or find any app that serves a particular purpose. This is particularly useful as you are already using it, as it is now open to your app. Once you spot an app you like, quickly jump to it by selecting the Apps tab and searching for it. If you're not sure what you need, then it's a simple matter of swiping left and right to browse the system and find what you need. The app is essentially a sidebar. It's worth noting that this is no other than a container, allowing you to use the app in addition to your other applications. The sidebar is easily customizable to suit your needs. Its look can be changed to a dark or light variant, depending on the theme selected. You may also choose to show it only for a limited amount of time. The sidebar is the perfect place to keep your apps and contact details in one place. Tapping the name of an app brings up a page that highlights the important information about the app. AppBrain can recommend similar apps as you read, or offer an advice page to
